

Ambitious strategies and plans are taken by the state to maximize and develop water resources, in order to meet and secure future development needs, which included the implementation of many important projects, such as the project of lining canals, developing the irrigation system, rationalizing consumption, and raising the efficiency of rainwater and torrential utilization. But despite these efforts, the water resources file is still facing some challenges, such as climate change and others, of which the state is working to confront.

this context, Canada Egypt Business Council and the Egyptian Business Council for International Cooperation will hold its next forum which brings together

The limited attendance beside an online live streaming

In order to enable comments as well Q&As for the rest of the Members, Experts, Politicians, Arab and Foreign Ambassadors

With:
